

# Help Your Patients Find Which Certain Dri is Right for Them

Dermatologists recommend **Certain Dri** brand more than any other **OTC** for their patients with hyperhidrosis.

**Certain Dri** offers 3 levels of sweat protection

The first step in managing  
excessive sweating

## Everyday Strength Clinical Solid & Roll-On

- Effective all-day antiperspirant + deodorant protection for more certainty against odor and sweating
- With 20% Aluminum Zirconium Complex
- Available in solid and roll-on formulations

A step up in managing the  
symptoms of hyperhidrosis

## Extra Strength Clinical Solid

- Extra-effective antiperspirant + deodorant in a solid form
- With 25% Aluminum Sesquichlorohydrate
- May be more gentle on sensitive skin

Prescription strength in an  
over-the-counter formulation

## Prescription Strength Clinical Roll-On

- With 12% Aluminum Chloride, the #1 doctor-recommended active ingredient for excessive sweating\*
- Most effective antiperspirant available without a prescription
- Helps stop excessive sweating for up to 72 hours
